

High Reliability Iron Melting Furnace Low Failure Metal Melting Furnace Induction Type

Our Product Introduction

for more products please visit us on melt-furnaces.com

Basic Information

- Place of Origin: China
- Brand Name: Huarui
- Certification: patent; national test report; quality management system
- Model Number: to be customized
- Minimum Order Quantity: 1 set
- Price: to be negotiated
- Packaging Details: waterproof
- Delivery Time: 30~45 days
- Payment Terms: T/T; L/C
- Supply Ability: 1000000 sets/year

Product Specification

- Durability: High
- Failure: Low
- Reliability: High
- Power Saving: High
- Maintenance: Low
- Safety: High
- Highlight: **Iron Melting Furnace Low Failure,
High Reliability Iron Melting Furnace,
iron smelting furnace**

Product Description:

The Medium Frequency iron melting furnace is induction melting furnace, it is a kind of highly efficient and reliable industrial equipment that can be used for melting and casting ferrous and non-ferrous metals. It is designed to provide ultimate safety, durability and power saving with low failure and maintenance rate. Its medium frequency induction heating system is robust and reliable. It has high heat efficiency and a fast melting speed which can save energy and time, ensuring maximum production output. The iron melting furnace is also equipped with advanced temperature control system, advanced protection system, and other modern technology to ensure safe and efficient working process. With its advanced design, it can provide users with the highest level of safety and energy saving.

Iron melting furnace is designed with strict safety measures. It provides complete protection against electric shock. It's equipped with over-temperature and over-current protection system to ensure safety during the operation. It also has an automatic power-off system to ensure that it won't overheat and cause any damage. With its high degree of durability, the iron melting furnace can work with a low failure rate, which ensures a long-term and reliable operation. In addition, the iron melting furnace has a low maintenance rate, which can reduce costs and enhance its efficiency.

The iron melting furnace uses advanced power saving technology to reduce energy consumption. It has a high heat efficiency and a fast melting speed which can save energy and time. This also ensures maximum production output. With its powerful performance and low failure rate, our induction melting furnace can offer great value for you and can be widely used in many industrial applications.

Features:

Product Name: induction Melting Furnace

Safety: Very High

Durability: Very High

Reliability: Very High

Power Saving: Very High

Maintenance: Very Low

Special Feature: Medium Frequency induction furnace

Technical Parameters:

Induction melting furnace power supply, thyristor type serial-connected resonance medium frequency type, (1.5 tons), as for other data of other capacity (tons), please check other pages in our this website.

Characteristic	Description
Type	GW1.5-1200-0.5S
Rated capacity (T)	1.5
Rated power (KW)	1200
rated frequency (HZ)	500

power supply (V)	575
inlet current (A)	1200
medium frequency voltage (V)	2800
load type	One power supply cabinet drives two induction furnaces
adapted transformer (KVA)	1250

Applications:

Huarui Iron Melting Furnace is a medium frequency induction furnace with waterproof packaging and a minimum order quantity of 1 set. It is certified with patent, national test report and quality management system. Huarui Iron Melting Furnace is highly durable, power saving, low maintenance and reliable, with low failure rate. Its price is to be negotiated, and delivery time is 30-45 days. Payment terms include T/T and L/C, and it can supply up to 1000000 sets/year.

Customization:

Huarui Medium Frequency Iron Melting Furnace is designed to provide customers with custom service with its brand name, model number, place of origin and other attributes. It is certified with patent, national test report and quality management system, and the minimum order quantity is 1 set. The price is to be negotiated, and all packages are waterproof. Delivery time is 30~45 days, and payment terms are T/T and L/C. The supply ability is 1000000 sets/year. The power saving, durability, failure, maintenance and reliability of the product are all high. As a reliable medium frequency electric melting furnace manufacturer and supplier, Huarui is able to provide customers with the best products.

Support and Services:

Iron Melting Furnace Technical Support and Service

We provide technical support and service for our customers who use our Iron Melting Furnace. Our team of experts can help you with any technical issues you may have with the Iron Melting Furnace.

We offer on-site support, telephone support, and online chat support. Our on-site support team can visit your premises to troubleshoot and repair any technical issues you are facing with the Iron Melting Furnace. Our telephone and online chat support teams can provide you with technical assistance and answer any questions you may have about the Iron Melting Furnace.

Our team is dedicated to providing the highest level of customer service and satisfaction. We do our best to ensure that your Iron Melting Furnace continues to work properly and efficiently. If you require technical support or service for your Iron Melting Furnace, please do not hesitate to contact us.
