

Electric Induction Metal Melting Furnace Energy Saving

Our Product Introduction

for more products please visit us on melt-furnaces.com

Basic Information

- Place of Origin: China
- Brand Name: Huarui
- Certification: patent; national testing report; quality management system
- Model Number: to be negotiated
- Minimum Order Quantity: 1 set
- Price: to be negotiated
- Packaging Details: water proof
- Delivery Time: 30~45 days
- Payment Terms: T/T; L/C
- Supply Ability: 1000000 sets/year

Product Specification

- Melting Efficiency: High
- Durability: High
- Maintenance: Low
- Power Saving: High
- Safety: Complete
- Reliability: High
- Highlight: Induction Metal Melting Furnace,
Metal Melting Furnace Energy Saving,
Electric induction metal melting

Product Description

Product Description:

The Metal Melting Furnace System is an advanced induction melting furnace that has been designed to offer high power savings, reliability, safety, durability, and low maintenance. This induction melting furnace is suitable for melting metals and alloys, as it is able to reach temperatures up to 2000°C. It also features an intelligent, self-diagnostic system that can monitor and adjust the operating conditions of the furnace to ensure optimal performance.

Our metal melting furnace system is one of the most reliable induction melting furnaces on the market with its high-grade stainless steel construction or aluminum steel construction and advanced induction heating technology. It provides complete safety with its multiple sensors and automatic shut-off feature. This electric induction furnace for metal melting also features a low-maintenance design with its durable components and easy-to-access parts.

The metal melting furnace is the perfect choice for anyone looking for a high-quality, reliable, and power-saving tool for melting metals and alloys. With its advanced induction heating technology, complete safety features, and low maintenance requirements, it is sure to provide users with years of reliable and efficient service.

Features:

Metal Melting Furnace System - The Metal Melting Furnace System is designed for metal melting and offers high durability, complete safety, high reliability, high melting efficiency and power saving.

Durability - High durability for long-term use.

Safety - Complete safety features to ensure secure operation.

Reliability - High reliability to ensure its smooth operation.

Melting Efficiency - High melting efficiency for faster melting process.

Power Saving - High power saving capabilities for cost-effective operation.

Technical Parameters:

Induction melting furnace power supply, thyristor type serial-connected resonance medium frequency type, (1 tons), as for other data of other capacity (tons), please check other pages in our this website.

| Characteristic | Description |
|------------------------------|--|
| Type | GW1.0-750-0.5S |
| Rated capacity (T) | 1.0 |
| Rated power (KW) | 750 |
| rated frequency (HZ) | 500 |
| power supply (V) | 575 |
| inlet current (A) | 750 |
| medium frequency voltage (V) | 2800 |
| load type | One power supply cabinet drives two induction furnaces |
| adapted transformer (KVA) | 800 |

Applications:

Huarui metal melting furnace system is a reliable and power-saving electric induction melting furnace that provides a complete safety and high melting efficiency. It is a perfect choice for melting metal in various application scenarios. This furnace system is certified by patent, national testing report, and quality management system, and has minimum order quantity of 1 set. Its price is to be negotiated, and it comes with water proof packaging. The delivery time is 30~45 days, and the payment terms can be T/T or L/C. Huarui has the supply ability of 1,000,000 sets per year. This furnace system has a high reliability, power saving, low maintenance, and complete safety. It is suitable for melting various types of metals, such as aluminum, copper, steel, etc. It is widely used in metal casting, heat treatment, and other industrial production processes.

Support and Services:

Metal Melting Furnace System Technical Support and Service

Our metal melting furnace system offers 24/7 technical support and service, ensuring that our customers get the best service as far as possible. Our technical team is experienced and knowledgeable in troubleshooting and maintenance of our electric furnace system, and are able to answer any questions or resolve any issues you may have.

Our technical team is available to help you with any of the following services:

Troubleshooting and repair of the metal melting furnace system

Installation and setup of the melting furnace system

Maintenance and preventative care of the melting furnace system

Providing information and advice on how to best use and maintain the melting furnace system

Providing assistance with any warranty issues

Our technical team is always available to answer any questions you may have and provide the best service and support for the melting furnace system.

Packing and Shipping:

Packaging and Shipping for Metal Melting Furnace System

The Metal Melting Furnace System is packaged in a box with foam inserts. It is shipped in a container filled with foam to protect it from any damage during transit.

The Induction Furnace System is shipped in a reusable container that is designed to protect the product from vibration and shock. It is also temperature controlled to prevent any damage during transportation

We also use an anti-shock packaging material to ensure that the Metal Melting Furnace System is not damaged during transportation
